Vinaya Manchaiah,
Lamar University, Texas

Alain Londero
Service d'ORL, Georges Pompidou France

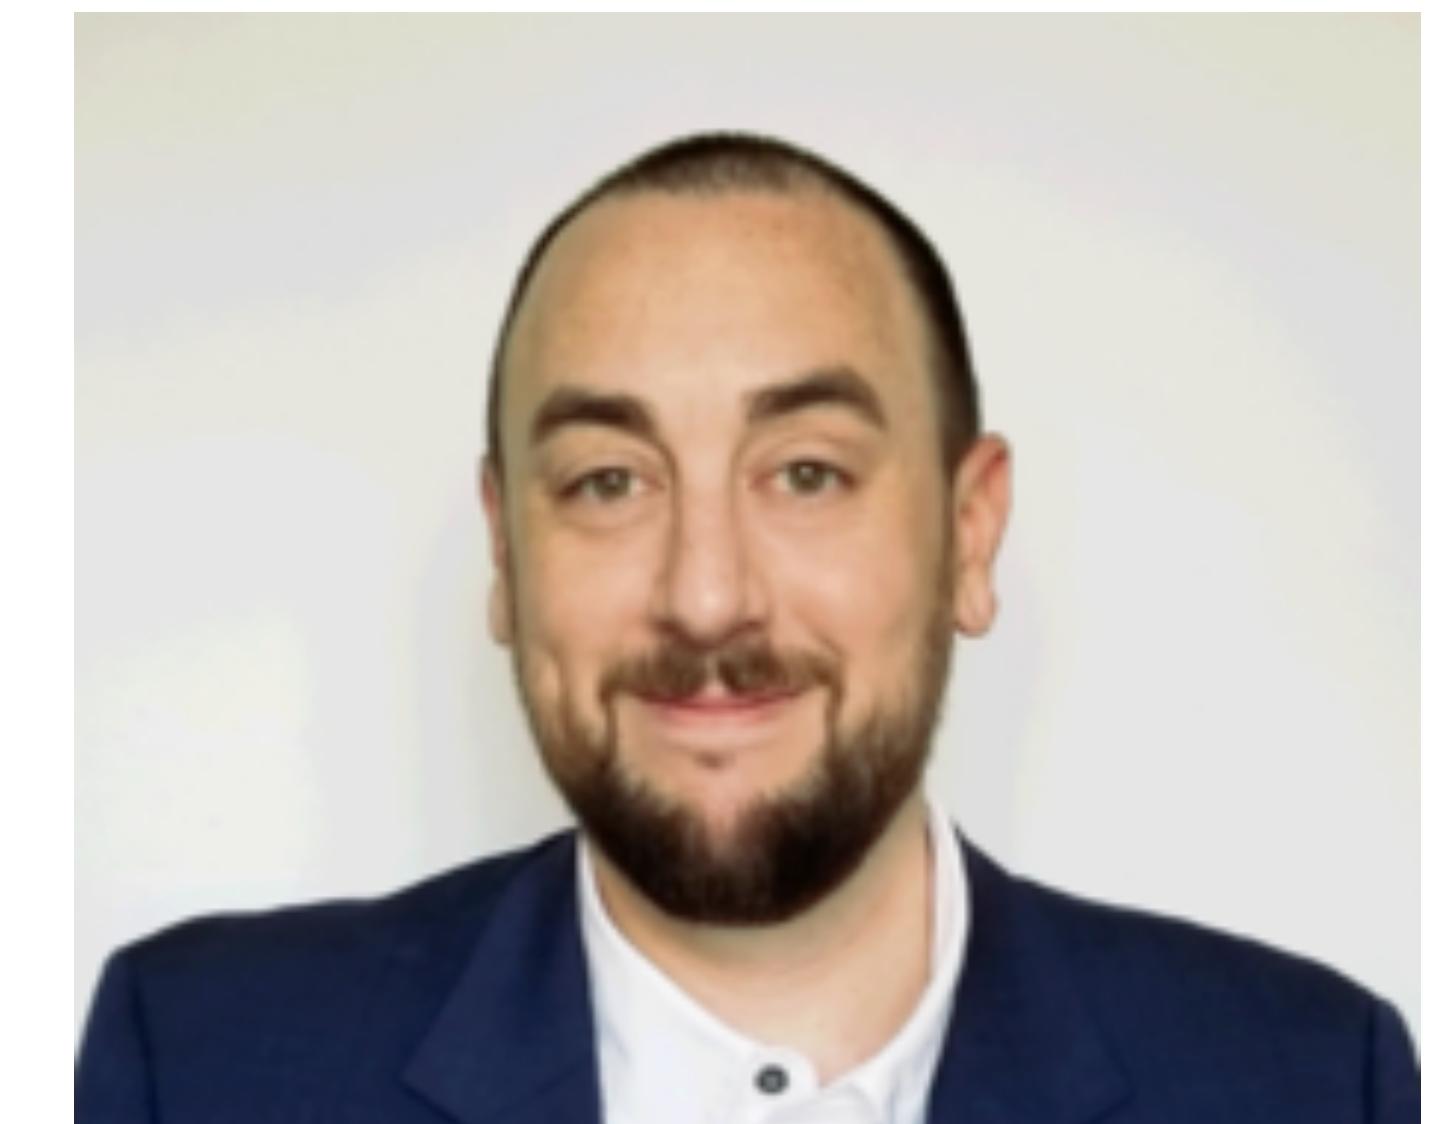

Guillaume Palacios
PainkillAR, TELECOM ParisTech, France

Aniruddha K. Deshpande
Hofstra University, US

Pierre Ratinaud
University of Toulouse, France

Ryan Boyd
Lancaster University, UK

THE STORY

- ❖ Online forums concentrate hundreds of thousands of spontaneous patients' reports, not biased by the medical interaction
- ❖ Machine learning proves to be a handy tool to extract information from these reports
- ❖ Comprehensive summaries of the heterogeneity of perceptions to provide insights

SOCIAL MEDIA DATA AND MEDICAL RESEARCH

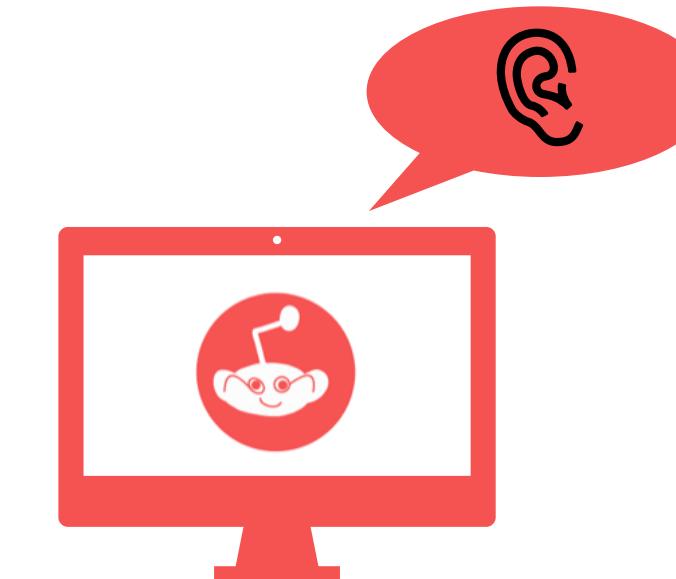

- Manchaiah, Londoro, Deshpande, Revel, Palacios, Boyd & Ratinaud. **What can we learn about tinnitus from Reddit data.** *Forthcoming*, 2021.
- Ni, Bellon-Harn, Zhang, Li & Manchaiah. **Twitter Usage Using Common Reference to Tinnitus.** *American Journal of Audiology*, 2020.
- Deshpande, Deshpande & O'Brien. **Hyperacusis and social media trends.** *Hearing, Balance and Communication*, 2019.
- Manchaiah, Ratinaud & Andersson. **Representation of tinnitus in the US newspaper media and in facebook pages: Cross-sectional analysis of secondary data.** *Interactive Journal of Medical Research*, 2018.
- Deshpande, Deshpande & O'Brien. **Study of Social Media Utilization by Individuals With Tinnitus.** *American Journal of Audiology*, 2018.
- Basch, Yin, Kollia, Adedokun, Trusty, Yeboah & Fung. **Public online information about tinnitus: A cross-sectional study of YouTube videos.** *Noise & Health*, 2018.

REDDIT DATA

- Posts from February 2011 to September 2019
- 101,000 posts created by 12,000 users were retained after data processing

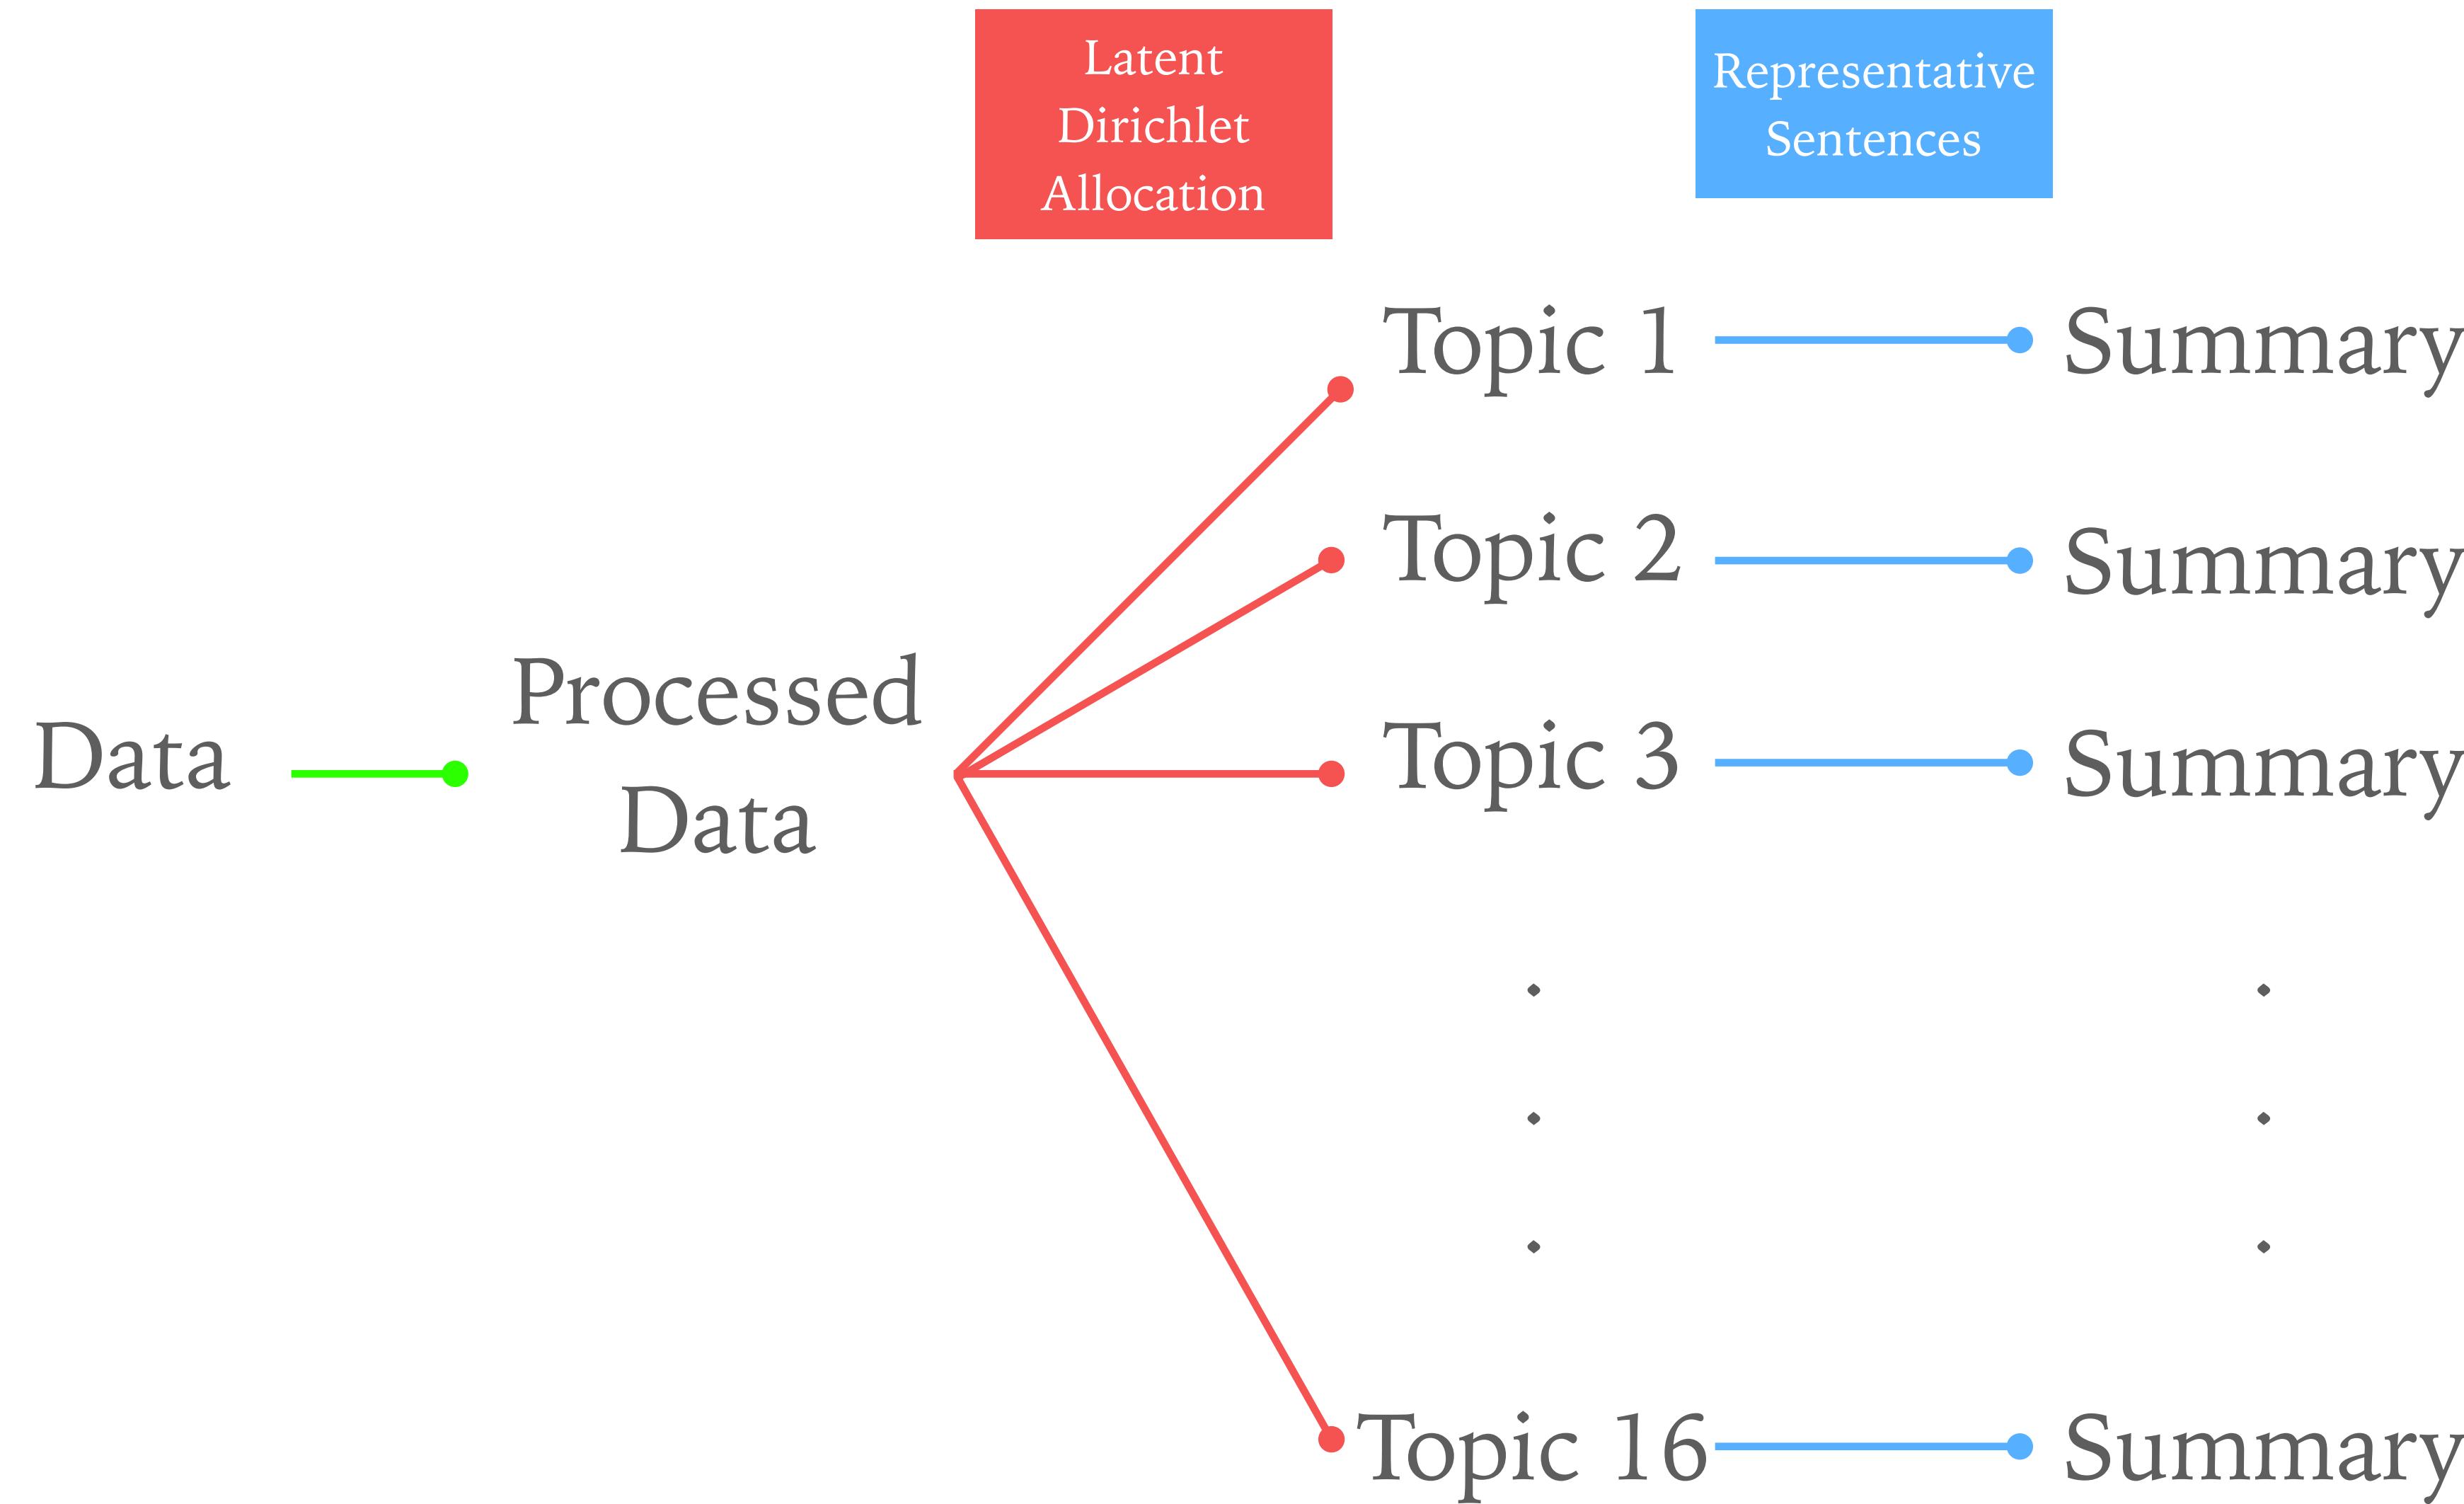

*Medical Interactions
Controlled and Filtered*

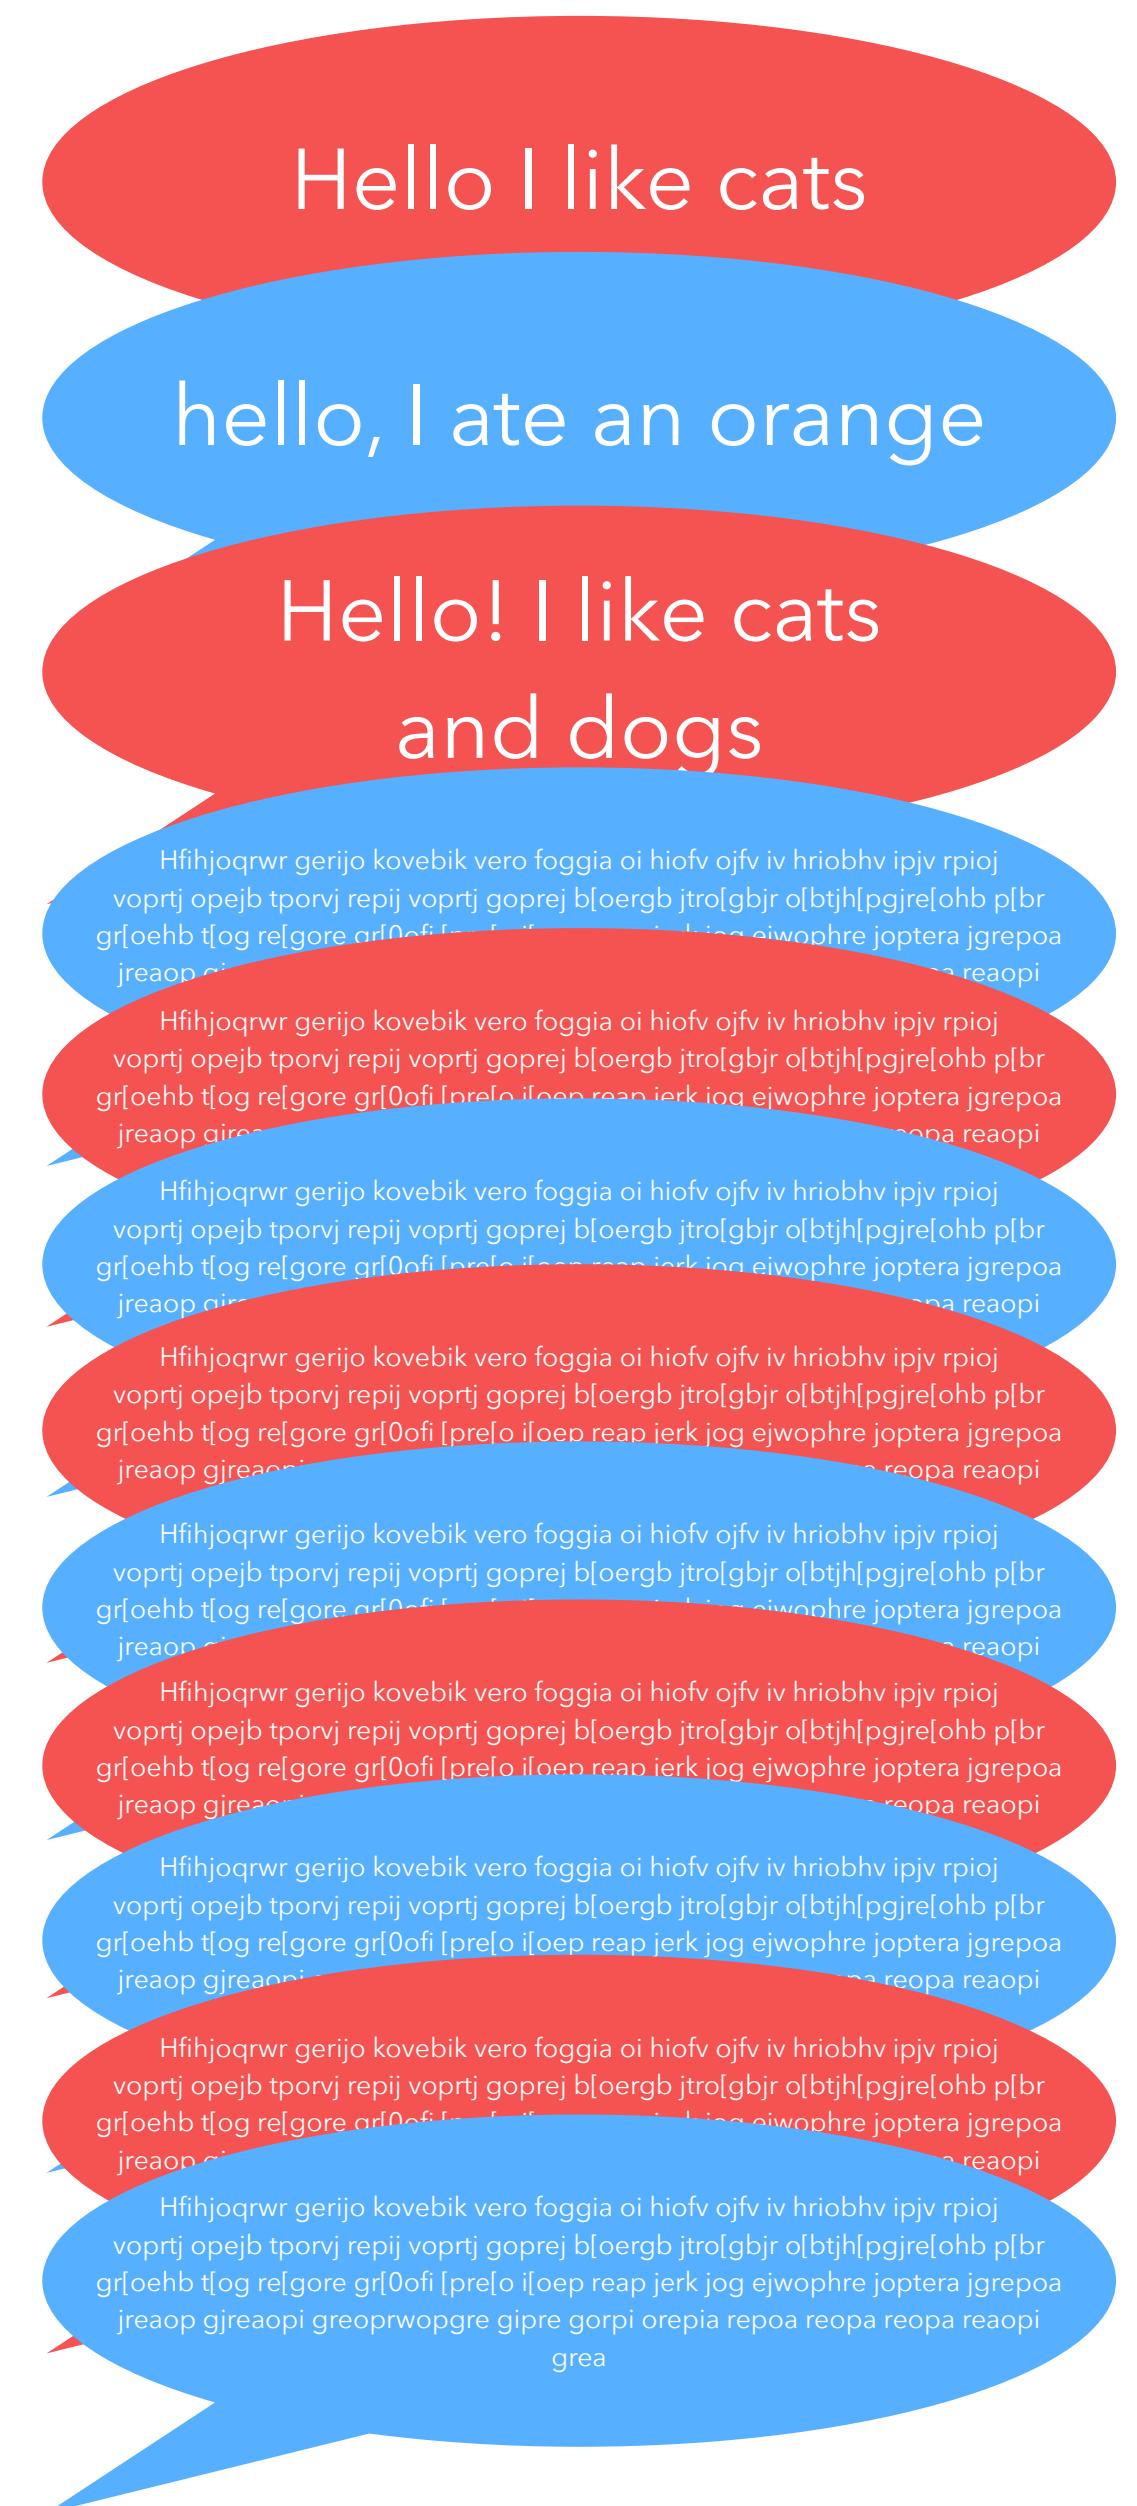

*Online Anonymity
Heterogeneity of perception*

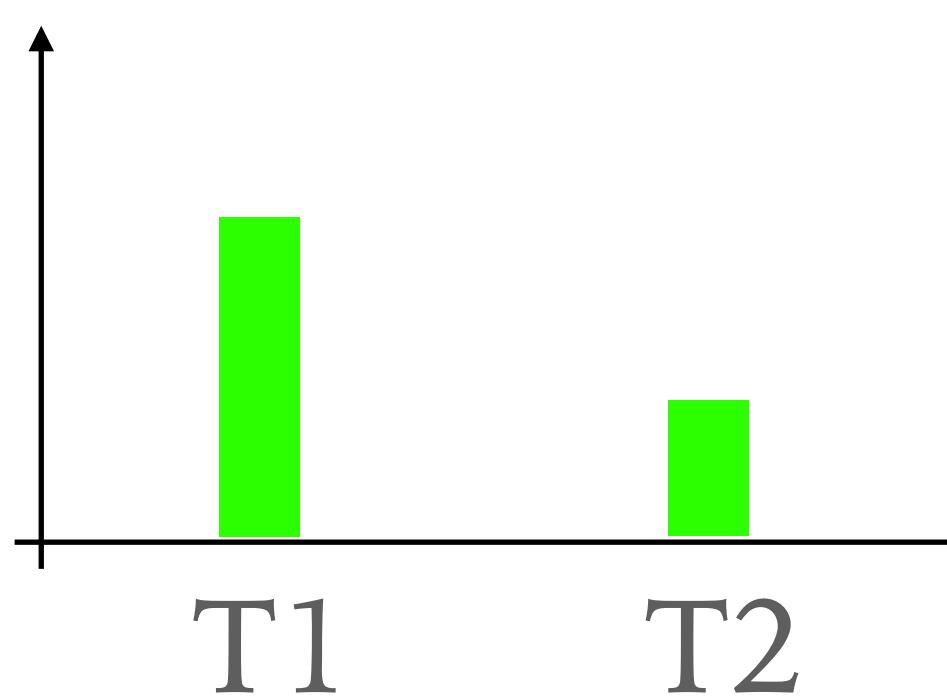

DATA ANALYSIS

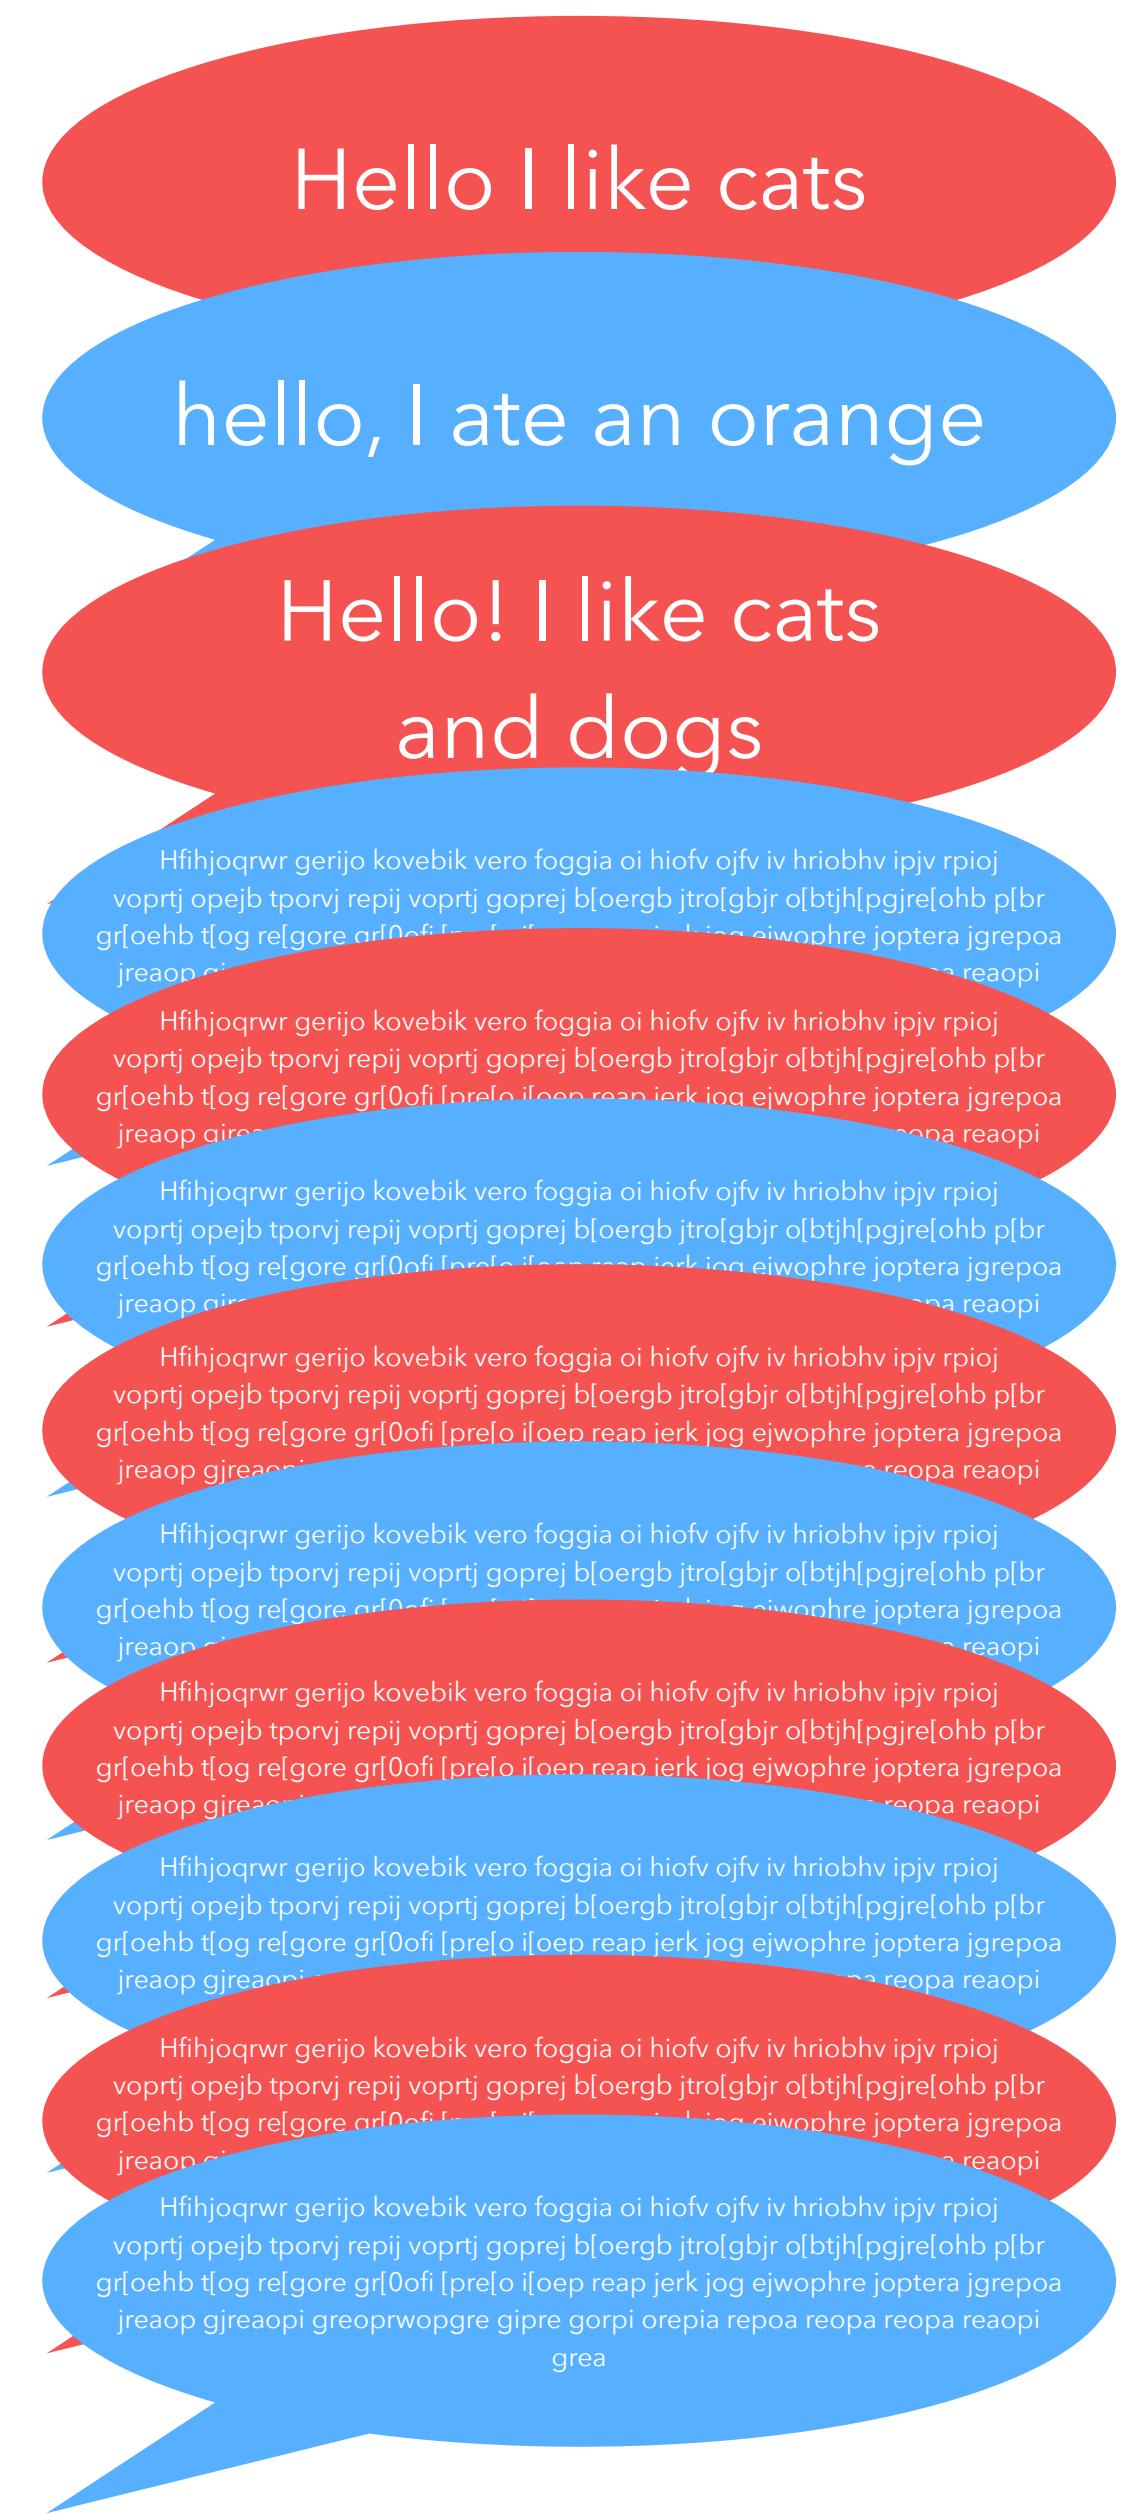

LATENT DIRICHLET ALLOCATION

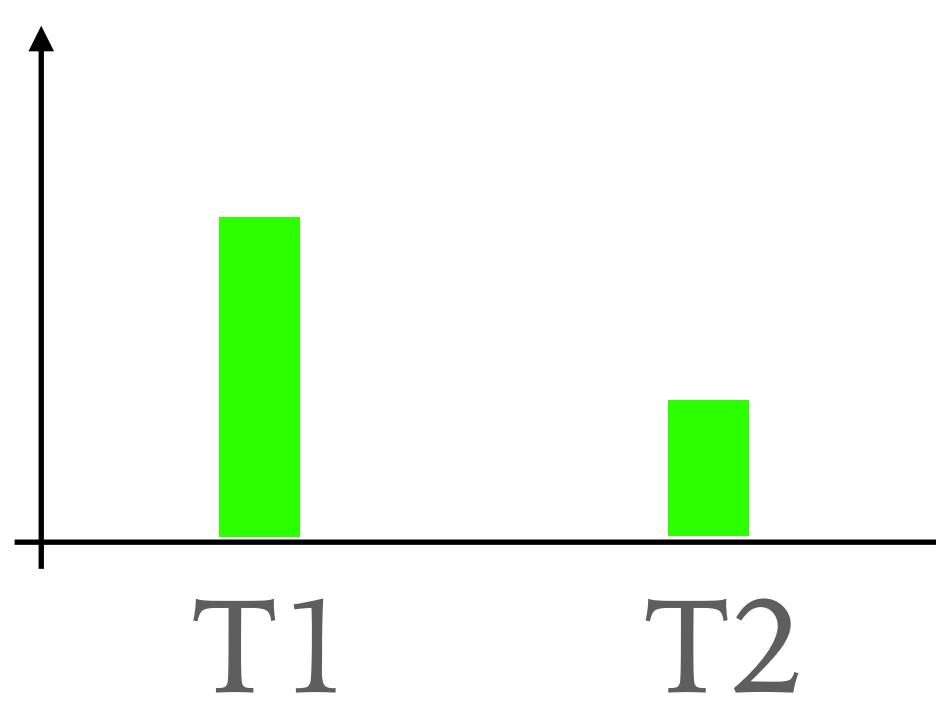

Corpus

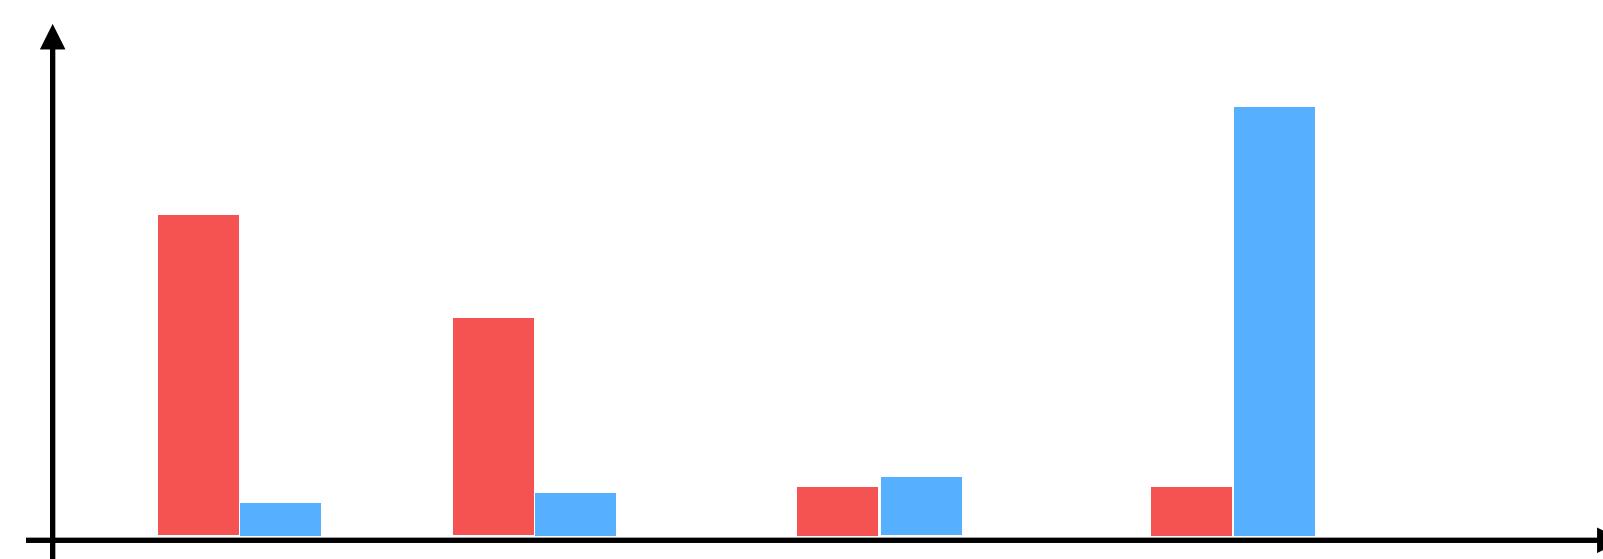

Corpus

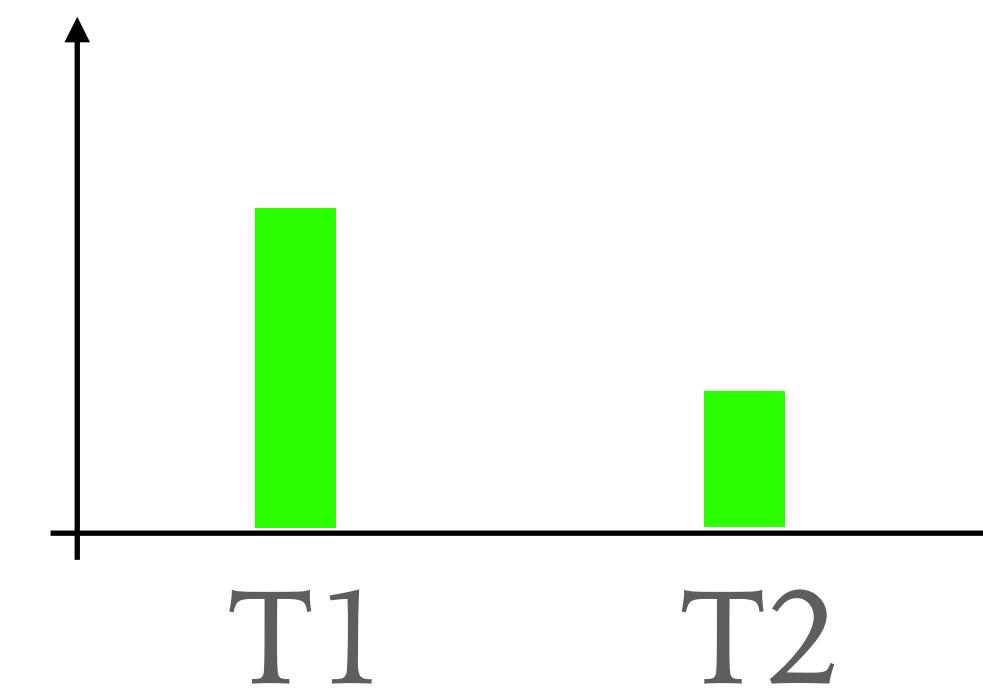

T1 T2

$V = \{\text{cat, dogs, hello, orange}\}$

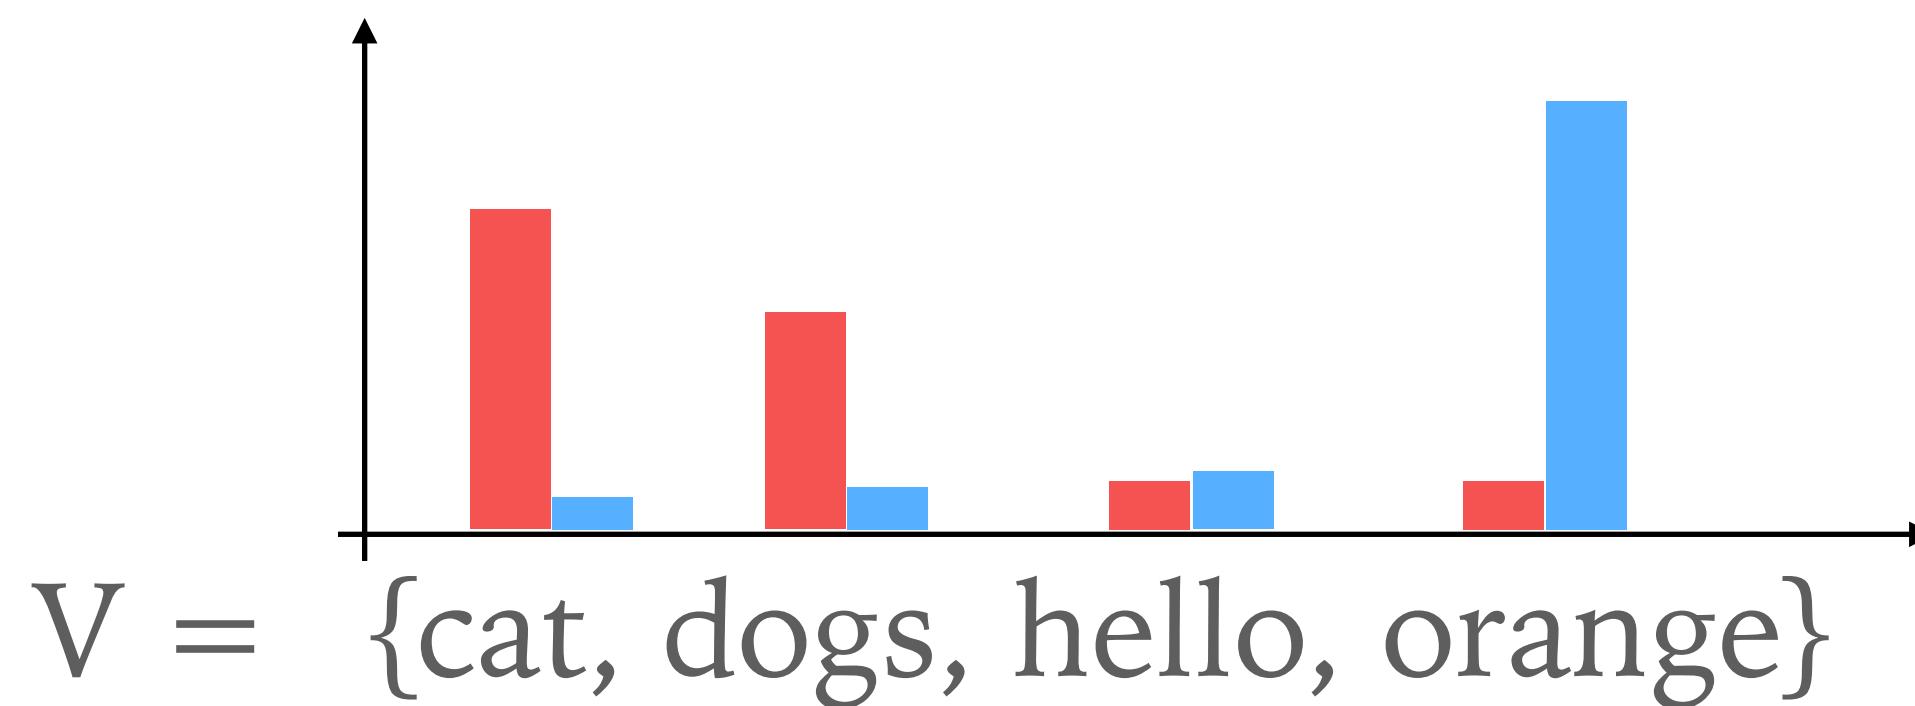

w_1, w_2, w_3, w_4

Corpus

- ✿ Choose the topic T of the first word
- ✿ Given the topic T, choose a word w_1
- ✿ Repeat for all the words

Time Perception

- ◆ Tinnitus Chronology
- ◆ Ever lasting Tinnitus

Peer Support

- ◆ Experience Sharing
- ◆ Support System
- ◆ Hope
- ◆ Complaints

Benefit of having people that understand
Deception of lack of understanding from the doctors

Cure and Coping

- ◆ State of Research
- ◆ Stress Management
- ◆ Interactions with Doctors

Identify sources of stress in caffeine, sugar, drugs...
Management with vitamins, natural products (mg)

Life's Impact

- ◆ Sleep Issues
- ◆ Depression

Teeth and Dental Surgeries
Neck and shoulder tensions
Jaw clinching and misalignment

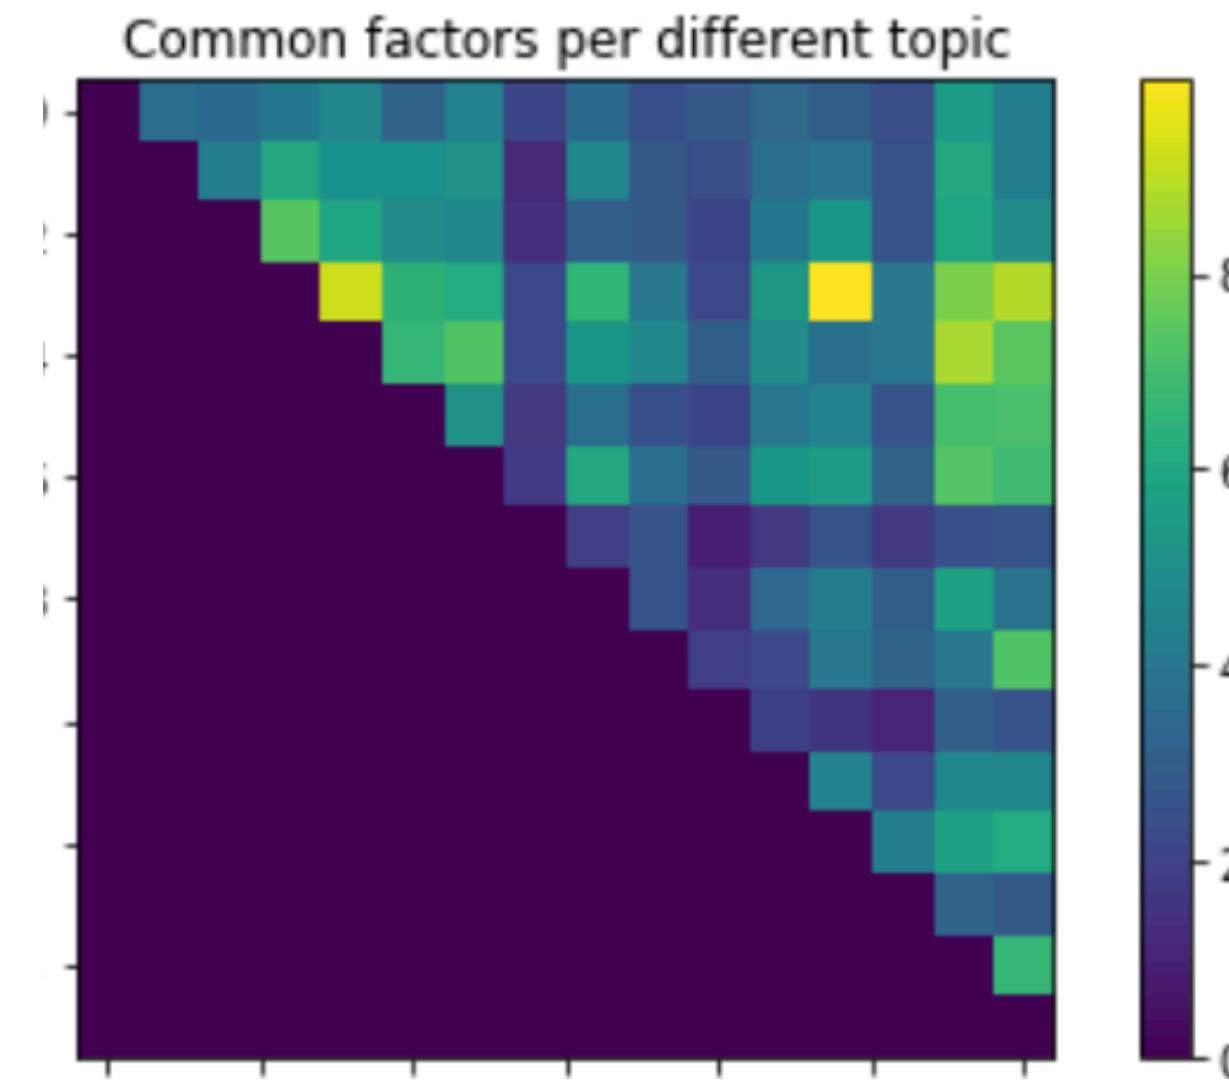

Causes

- ◆ TMJ
- ◆ Brain Damage
- ◆ Hear Loss
- ◆ Loud Music

FURTHER RESEARCH

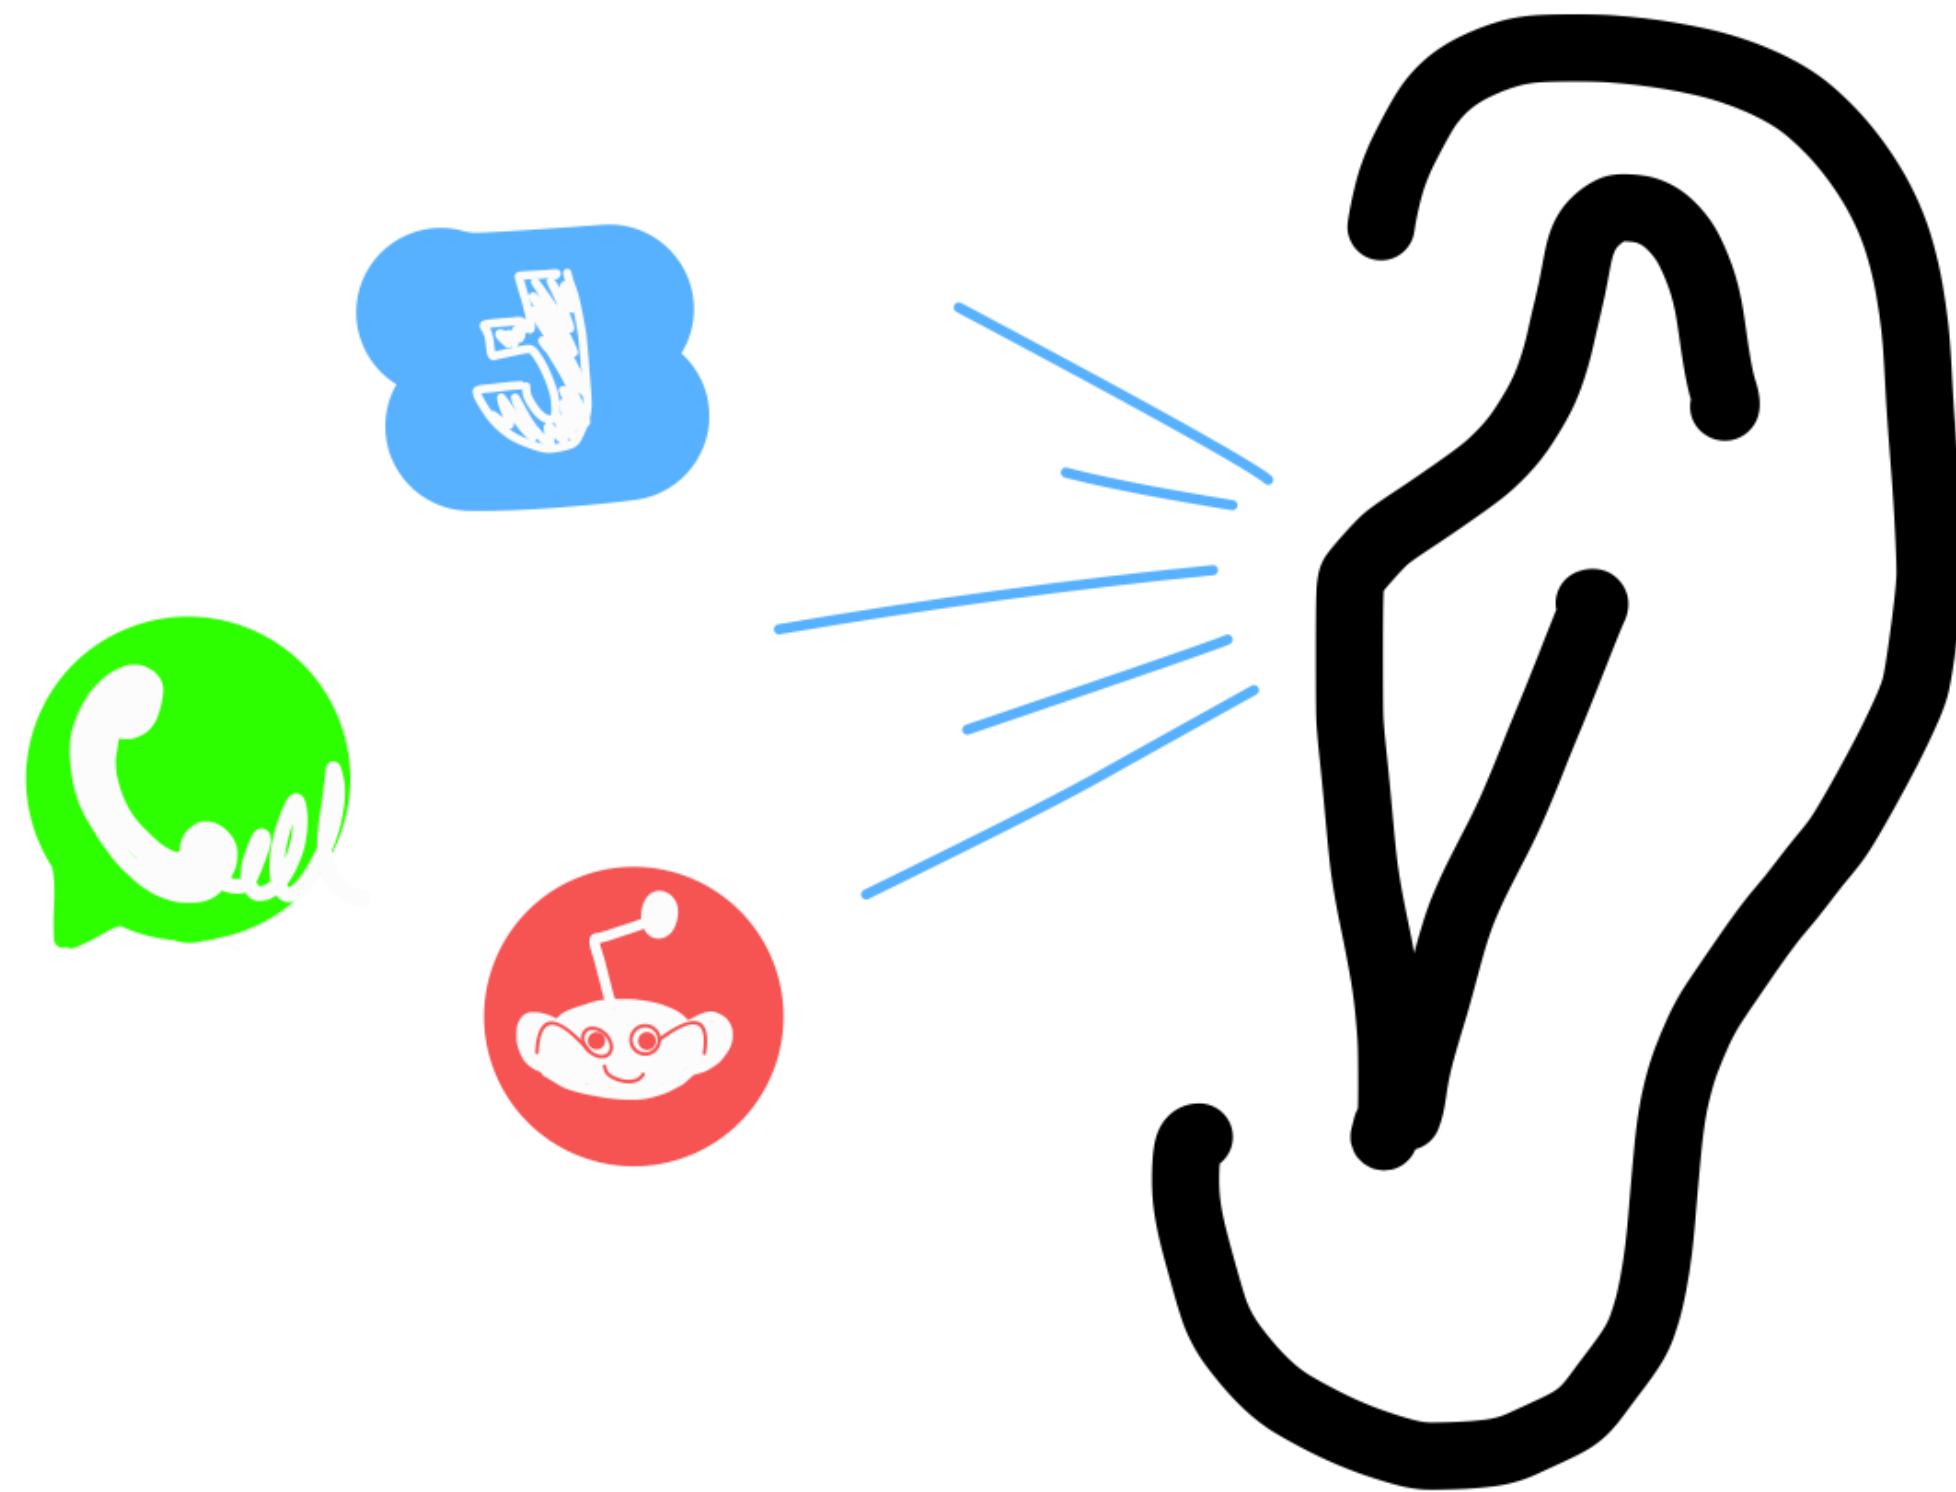

TOPIC DYNAMICS

- Leverage the users dynamics to quantify cooccurrence of topics

CONCLUSION

- ❖ Tinnitus online data can be a **complementary** way to interact with the patients symptoms, provided that the large amount data can be **digested** comprehensively
- ❖ There is a lot of room for further **collaboration** with therapists and practitioners to make the most from these analyses

THANK YOU!
